

How to Collect Oral Fluid

For Therapeutic Drug Monitoring

Intercept® i2™ Collection Device

To ensure proper collection, check the patient's mouth prior to collecting the sample. If the patient has had anything in his or her mouth within the past 10 minutes, wait 10 minutes prior to collecting the sample.

1
Check the expiration date and remove the collection pad from the pouch

2
Without touching the pad, insert the pad under the tongue with white side up

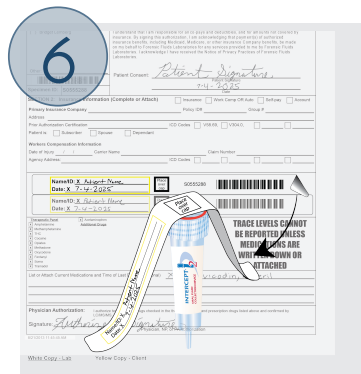

3
Hold the pad under the tongue until the indicator turns blue - 3 minutes on average

4
Remove the specimen vial from the collection device package

5
Unscrew the cap and place the collection device pad down in the vial - replace cap tightly

6
Remove a label from the completed requisition form* and seal the tube

7
Insert sealed tube and completed form into specimen bag and seal

8
Use the prepaid UPS shipping bags to send samples to FFL
